Testing and Certification for CE Marking
Exposure to high temperatures and/or flames carries a significant risk of burn injuries. It is therefore important that any protective clothing has been designed and tested to the relevant standards.

Why use SATRA?
Extensive technical knowledge and expertise.

Customers benefit from the global presence, strength and authority of the SATRA brand.

Reputation for quality and reliability.

Customers benefit from continued investment in state-of-the-art facilities.

No hidden charges – quick turnaround, reports, consumables, storage and disposal all included.

Specific Benefits
- Recognised as the UK’s leading European Notified Body for CE marking of PPE
- Complete service from quotation to certification – a one stop shop for heat and flame testing
- Full in-house testing with control of the project.

Real heat and flame conditions
SATRA is a European Notified Body for the testing and certification of heat protective clothing, footwear and gloves. SATRA has continued to develop its facilities in this area and has new dedicated laboratories equipped to assess heat transfer characteristics and the effects of various ignition sources. Our heat sensing manikin (SATRA Instrumented Dummy – SID) can assess clothing under real fire conditions and incorporates sensors to evaluate the likelihood and severity of any potential burn injuries.

CE Marking
SATRA experts are able to test your products in our ISO 17025 accredited laboratories to the relevant standards and provide all the services required for assessing and certifying the PPE to enable CE marking for the European Market.
